github.com/KaungOrYours | Singapore (Aljunied Crescent) | DOI: 10.1109/RASSE.2025.11315309

PROFESSIONAL SUMMARY

Singapore-based AI researcher and data scientist with a First Class BSc in Computing Science and an MSc Data Science in progress (University of Hertfordshire, Dec 2026). IEEE Xplore first-author (DOI: 10.1109/RASSE.2025.11315309) with hands-on experience in agent-based modelling, LLM systems, machine learning, and end-to-end data pipelines. Currently leading Ka-Nova — a Generative Agent-Based Model of digital-trust infrastructure for SME credit access, built on Mesa, LangChain, and Llama 3.2 with 300 Monte Carlo runs across 1.5M simulated agent-years. Seeking ML Engineer, Data Scientist, or AI Researcher roles in Singapore.

TECHNICAL SKILLS

Languages & Frameworks: Python, R, SQL, JavaScript, Flask, FastAPI

Machine Learning: scikit-learn, PyTorch, XGBoost, Random Forest, Ensemble Methods, SHAP

LLM & Generative AI: LangChain, Llama 3.2, Embeddings, Prompt Engineering, Fine-tuning (JSONL)

Agent-Based Modelling: Mesa 2.3.0, Monte Carlo simulation, Policy regime calibration, SALib (sensitivity analysis)

Statistical Methods: Bayesian Inference, Causal Analysis, Time Series, Regression, Mann-Whitney U, Cohen d

Data & Visualisation: pandas, NumPy, Tableau, Matplotlib, Plotly, Streamlit

Cloud & Deployment: Docker, AWS, RunPod (RTX 4090), Git/GitHub, CI/CD, Linux, Vercel

Research: Experimental design, Academic writing, Literature synthesis, Peer review

WORK EXPERIENCE

Freelance Data Scientist

Jan 2024 – Present

Independent · Remote (Southeast Asia)

- Built and deployed Ka-Nova GABM — a Mesa + LangChain + Llama 3.2 agent simulation with 300 Monte Carlo runs and 1.5M agent-years; targeting JASSS 2026 publication.
- Developed dockerised AutoML stack (FastAPI + Docker + Vercel) for SME clients covering sales forecasting, churn analysis, and dashboarding; live at sme-analytics-platform.vercel.app.
- Delivered cross-border consulting on analytics, NLP systems, and bespoke ML pipelines for SMEs and consulting houses across Myanmar and Singapore.
- Supervised by Dr. Md Saifullah Bin Razali (UH); research validated with Mann-Whitney U, Cohen d, and Sobol sensitivity analysis ($p < 0.001$).

Data Analyst

Apr 2021 – Apr 2023

Khine Myal Min Co. Ltd. · Mandalay, Myanmar

- Owned reporting and forecasting for a distribution business through a period of unprecedented economic volatility; delivered real-time Power BI dashboards replacing weekly manual reporting.
- Built Python/SQL pipelines for sales, supply chain, and operations data; applied regression and hypothesis testing to identify revenue drivers.
- Reduced inventory turnover time by ~15% through data-driven stock optimisation recommendations presented to senior management.

AIIESEC in Myanmar — Multiple Roles

2018 – 2021

National Marketing Team Member · Organising Director · Local Director

- National Marketing Team Member (2021); Organising Director, Japan-Myanmar Friendship Campaign (2020–2021); Local Director of Outgoing Global Volunteer (2020–2021).
- Applied data-driven outreach strategies and managed partnership analytics, contributing to measurable growth in corporate partnership revenue.

EDUCATION

MSc Data Science

2026 – Present

University of Hertfordshire, UK · via PSB Academy Singapore

Cornerstone thesis: Ka-Nova GABM. Key modules: Advanced Machine Learning, Statistical Inference, Computational Social Science.

BSc (Hons) Computing Science — First Class Honours

2024 – 2025

Coventry University · via PSB Academy Singapore · PSB Academy Global Stage Award

Capstone published as IEEE RASSE 2025 first-author paper (DOI: 10.1109/RASSE.2025.11315309). Top module score: 91/100.

Higher National Diploma — Computer Programming, Grade A

2018 – 2023

iNet College, Mandalay · Pearson Overall Merit Award · Students' Union President (2 yrs 9 mos)

RESEARCH & PUBLICATIONS

Conflict Risk Forecasting — IEEE Xplore First Author (DOI: 10.1109/RASSE.2025.11315309)

- Cross-country macro and governance indicator pipeline forecasting onset of armed conflict across 195 countries (1960–2023) using Python, scikit-learn, and SHAP-based interpretability.
- Data sources: UCDP, World Bank, Freedom House. Visualisation: Tableau dashboard (public). Presented at IEEE RASSE 2025.

Ka-Nova GABM — MSc Research (Targeting JASSS 2026)

- Generative Agent-Based Model simulating how digital-trust infrastructure reshapes corruption and SME credit access in fragile economies.
- Mesa 2.3.0 + LangChain + Llama 3.2 on RunPod RTX 4090. 300 Monte Carlo runs, 1.5M agent-years. Key results: Corruption Index 0.189 (Full MFU) vs 0.933 (Military); Coup Probability 0.000 (MFU) vs 0.600 (Military).

SELECTED PROJECTS

SME Analytics Platform — Live Deployment

- Dockerised AutoML stack for SMEs: sales forecasting, churn analysis, dashboarding. FastAPI backend, deployed on Vercel. Live at sme-analytics-platform.vercel.app.

pdf2epub — Open-Source FastAPI Portfolio Project (GitHub: KaungOrYours)

- PDF-to-EPUB conversion API built with FastAPI, containerised via Docker. Demonstrates REST API design, file processing, and containerisation skills.

VOLUNTEER EXPERIENCE

Volunteer Teacher — Pan Pyo Thu Charity Group, Mandalay (Mar 2018 – Dec 2020) | AIESEC Vietnam — autistic children aged 6–17 (Aug–Oct 2018)

Organisation Manager — Sparks of Hope SOH, Myanmar (Aug 2018 – Aug 2019): coordinated youth volunteers for orphan outreach and community events.

ADDITIONAL INFORMATION

Languages: English (Professional), Burmese (Native)

Work Authorisation: Based in Singapore (Tanjong Pagar); open to discuss visa/sponsorship requirements.

Research Target: JASSS 2026 (Ka-Nova GABM). PhD interest: AIT Thailand (Royal Thai Government Scholarship, Feb 2027 intake).

Open to: ML Engineer, Data Scientist, AI Researcher, MLOps Engineer, BI Analyst roles in Singapore.
