SUMMARY

Data engineer and software developer with a First Class BSc in Computing Science, an in-progress MSc in Data Science, and 3+ years of experience in data engineering and software development. Builds Python and SQL data pipelines, C# industrial control applications, and AI-driven document workflows. Currently lead software developer and AI engineer at a marine equipment company, working with Siemens PLCs and industrial data systems. First-author IEEE Xplore publication.

TECHNICAL SKILLS

Languages: Python, SQL, C#, JavaScript, Bash, HTML/CSS
Data Engineering: ETL, data pipelines, Databricks, AWS Glue, pandas, NumPy, feature engineering, time-series data, InfluxDB, SQLite
Backend and Desktop: FastAPI, Flask, REST API design, .NET Framework, WinForms, PySide6, S7netplus, Modbus RTU
BI and Dashboards: Power BI, Tableau, Grafana, operational dashboards
Industrial Automation: Siemens S7-1500 PLC communication, vessel control systems, offshore commissioning
CAD Data Processing: DXF/DWG parsing, ezdxf, ACadSharp, JSON schema design
DevOps and Cloud: Docker, Docker Compose, Linux, Git, GitHub, CI/CD, AWS, Vercel, n8n, RunPod GPU cloud
Machine Learning and AI: scikit-learn, PyTorch, XGBoost, LangChain, SHAP, agent-based modelling

PROFESSIONAL EXPERIENCE

Lead Software Developer and AI Engineer Aug 2026 – Present
Tiancheng Electrical Marine Equipment Pte. Ltd. *Singapore*

- Develop and maintain C# (.NET Framework) WinForms control applications that communicate with Siemens S7 PLCs (S7netplus) and a dynamic positioning system (Modbus RTU) on industrial touchscreen PCs.
- Build and maintain the data layer using SQLite, AWS InfluxDB v2, and Grafana dashboards for real-time monitoring of sensor data.
- Manage software releases and deployments to industrial PCs, including backup, verification, and rollback procedures.
- Develop Python tools for engineering document processing, including DXF/DWG to JSON conversion (ezdxf, ACadSharp), data extraction, and a backend pipeline with automated tests (pytest) and a PySide6 GUI.
- Lead R&D on AI-driven vessel positioning and mooring control; conduct offshore visits for commissioning and system validation.
- Lead and coordinate junior developers.

Freelance Software and Data Engineer Jan 2024 – Jul 2026
Independent *Singapore / Remote*

- Built and deployed end-to-end data applications: FastAPI backend, Python data-processing layer, and web frontend, containerised with Docker Compose and shipped to cloud.
- Automated data workflows with n8n on Docker, including scheduled pipelines, webhook-triggered ingestion, and multi-step orchestration.
- Processed large datasets on GPU cloud (RunPod RTX 4090) through reproducible pipelines feeding interactive dashboards.

Data Analyst Apr 2021 – Apr 2023
Khine Myal Min Co. Ltd. *Mandalay, Myanmar*

- Built Python and SQL data pipelines across sales, supply-chain, and operations data, automating extraction, transformation, and reporting and cutting data-prep time from hours to minutes.
- Developed and maintained live Power BI dashboards connected to SQL databases, used daily by management and operations teams.

PROJECTS

SME Analytics Platform | *FastAPI, Python, SQL, Docker Compose, Vercel* 2024

- End-to-end analytics pipeline (FastAPI, Python processing, web frontend) delivering sales forecasting, churn analysis, and client dashboards.

Conflict Risk Forecasting (IEEE Xplore) | *Python, scikit-learn, SHAP, Tableau* 2025

- End-to-end ML pipeline over 195 countries (1960–2023) with feature engineering, model training, and SHAP interpretability. First-author paper at IEEE RASSE 2025 (DOI: 10.1109/RASSE.2025.11315309) with a Tableau results dashboard.

Ka-Nova GABM | *Mesa, LangChain, Llama 3.2, Three.js, RunPod* 2026

- Large-scale agent-based simulation (300 Monte Carlo runs, 1.5M agent-years on GPU cloud) with reproducible pipelines and a Three.js visualisation dashboard.

EDUCATION

University of Hertfordshire (via PSB Academy) Singapore
MSc Data Science, final-project stage *Jan 2026 – Dec 2026 (Expected)*

Coventry University (via PSB Academy) Singapore
BSc (Hons) Computing Science, First Class Honours; PSB Global Stage Award *2024 – 2025*

iNet College Mandalay, Myanmar
HND Computer Programming, Grade A; Pearson Overall Merit Award *2018 – 2023*
